

Maternal and Child Health

The Maternal and Child Health Program of Home Health VNA provides expert medical care designed to maximize the health and quality of life of mothers, infants, children and families. Our highly skilled nursing team includes registered nurses who have advanced certifications in pediatric hematology and oncology and are expert in the needs of children undergoing complex medical treatments. The MCH team has advanced training or certifications in lactation, nasogastric insertions, cardiac care, IV therapy, wound care, and diabetes.

Key Services

- Asthma treatment and teaching
- Cardiac care
- Complex IV therapy and/or oncology care
- Diabetes treatment and teaching
- Postpartum services including breastfeeding support, jaundice assessment and labs
- Prenatal care for high risk pregnancies
- Newborn care of premature infants
- Wound care
